|                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Properties:</b>           | <p>AKEMI® Active Thinner is a high-quality thinner with a high-performance drying accelerator for AKEMI® fillers and primers.</p> <p>The product is characterized by the following properties:</p> <ul style="list-style-type: none"><li>- strong acceleration of the cross-linking of PU lacquers for fast and safe hardening even at low temperatures</li><li>- allows safe drying even without heating</li><li>- ideal for spot repair applications</li><li>- saves energy costs</li></ul> |
| <b>Application Area:</b>     | <p>Drying accelerator for all AKEMI® fillers and primers especially for spot repair applications.</p>                                                                                                                                                                                                                                                                                                                                                                                         |
| <b>Special Notes:</b>        | <ul style="list-style-type: none"><li>- For professional use only.</li><li>- Within the EU: Subject to the self-service prohibition regulation and shall only be sold by specialised sales outlets.</li><li>- For proper waste disposal the container must be completely emptied.</li><li>- Recycling in accordance with the guidelines of EU Decision 97/129 EC on the Packaging Directive 94/62/EC.</li></ul>                                                                               |
| <b>Instructions for Use:</b> | <ol style="list-style-type: none"><li>1. Mix the filler or primer with the hardener.</li><li>2. Add AKEMI® Active Thinner depending on the desired spray viscosity.</li><li>3. Mix well with filler or primer and hardener.</li></ol>                                                                                                                                                                                                                                                         |
| <b>Technical Data:</b>       | <p>Base: ester-containing solvents<br/>Odour: typical, like solvents<br/>Colour: clear, colourless<br/>Density: 0.88 g/cm<sup>3</sup><br/>VOC: 872 g/l</p>                                                                                                                                                                                                                                                                                                                                    |
| <b>Storage:</b>              | <p>If stored in dry and cool condition (5-25°C/41-77°F) in its closed original container at least 36 months from production.</p>                                                                                                                                                                                                                                                                                                                                                              |
| <b>Health &amp; Safety:</b>  | <p>Read Safety Data Sheet before handling or using this product.</p>                                                                                                                                                                                                                                                                                                                                                                                                                          |
| <b>Important Notice:</b>     | <p>The above information is based on the latest stage of development and application technology. Due to a multiplicity of different influencing factors, this information – as well as other oral or written technical advises – must be considered as non-binding hints. The user is obliged in each particular case to conduct performance tests, including but not limited to trials of the product, in an inconspicuous area or fabrication of a sample piece.</p>                        |
