Technical Data Sheet

Properties:

AKEMI® Hand & Tool Wipes are ready-to-use cleaning wipes. They contain non-ionic surfactants and other high-quality additives.

The product is characterized by the following properties:
- easy and quick to use
- good cleaning performance
- alternative to strong solvents
- contains moisturising and nourishing components
- contains easily biodegradable raw materials
- pleasant smell

Application Area:

AKEMI® Hand & Tool Wipes are used to remove dirt such as grease, oil, fresh adhesive and sealant residues, fresh paint and tar from hands and tools.

Instructions for use:

1. Before first use, remove the lid and pull the wipe a few centimeters out of the middle of the roll through the opening in the lid. Then replace the lid on the can.
2. For application, pull the wipe out of the can and tear it off at the perforation.
3. Clean your hands or tools.
4. Close the flap in the lid tightly immediately after use.

Special Notes:

- For professional use only.
- Must not be applied to surfaces to be bonded or sealed; always treat these surfaces with AKEMI® Cleaner I or Cleaner A beforehand.
- Placing wipes on absorbent surfaces may cause temporary discolouration.
- Always close the container tightly to prevent the wipes from drying out.
- Dispose of used wipes in the residual waste, do not throw them into the toilet.
- For proper waste disposal, the container must be completely emptied.
- Recycling in accordance with the guidelines of EU Decision 97/129 EC on the Packaging Directive 94/62/EC.

Technical Data:

Colour: white
Odour: citrus fruit

Storage:

If stored upright in dry and cool condition (5 - 25°C/41 - 77°F) in its closed original container at least 36 months from production.

Health & Safety:

Read Safety Data Sheet before handling or using this product.

Important Notice:

The above information is based on the latest stage of development and application technology. Due to a multiplicity of different influencing factors, this information - as well as other oral or written technical advises - must be considered as non-binding hints. The user is obliged in each particular case to conduct performance tests, including but not limited to trails of the product, in an inconspicuous area or fabrication of a sample piece.
